Login

- HIGH No visual identity — generic TextInputLayout, no brand illustration
- HIGH Single flat green color, no gradient or depth
- MED Logo is an emoji 🍌, not a crafted SVG mark
- MED No background visual — blank white, zero atmosphere

Dashboard (Accueil)

- HIGH GridLayout cards are emoji + text only — no imagery, no depth
- HIGH All 6 cards identical weight — no visual hierarchy
- MED No bottom navigation bar — Toolbar is the only nav anchor
- MED Badge counter uses basic red circle, not Material You spec

Catalogue

- HIGH Product image is tiny (72dp) — product photo should dominate
- HIGH ListView rows feel sparse and identical — no visual differentiation
- MED Price and title same visual weight — price should be accented
- MED Add-to-cart button is full-width row intrusion — poor UX

Panier (Cart)

- HIGH Quantity +/- buttons are generic filled buttons — harsh contrast
- MED Total bar has no visual elevation differentiation from list
- MED No swipe-to-delete gesture — quantity 0 only way to remove
- LOW Empty state is plain text — needs illustration + CTA

Profil

- HIGH Photo placeholder is a system icon — no avater initials fallback
- MED All fields stacked equally — no section grouping or breathing room
- MED Déconnexion button same size as Sauvegarder — destructive action hidden in
- LOW No header / Toolbar — screen feels disconnected from app
